

Code Changes Required for Vercel Deployment - Manus Design

Overview

The Vercel deployment is showing an outdated design. You need to make these changes in VSCode and push to GitHub to get the Manus design live.

File 1: `vercel.json`

Location: Root of your project

Current Content (WRONG):

JSON

```
{
  "buildCommand": "npm run build",
  "startCommand": "npm start",
  "outputDirectory": "dist",
  "env": {
    "NODE_ENV": "production"
  },
  "functions": {
    "server/_core/index.ts": {
      "runtime": "nodejs20.x"
    }
  },
  "routes": [
    {
      "src": "/api/*.\"",
      "dest": "/index.js"
    },
    {
      "src": "/.*\"",
      "dest": "/index.js"
    }
  ]
}
```

Replace With (CORRECT):

JSON

```
{
  "buildCommand": "npm run build",
  "outputDirectory": "dist",
  "functions": {
    "server/_core/index.ts": {
      "runtime": "nodejs20.x"
    }
  },
  "routes": [
    {
      "src": "/api/*.\"",
      "dest": "/index.js"
    },
    {
      "src": "/.*\"",
      "dest": "/index.js"
    }
  ]
}
```

What Changed:

- ❌ Removed `"startCommand": "npm start"` (invalid in Vercel)
- ❌ Removed `"env": { "NODE_ENV": "production" }` (invalid in Vercel)

File 2: Verify `client/src/pages/PropertyHome.tsx`

Location: `client/src/pages/PropertyHome.tsx`

Key Lines to Verify (Lines 148-155):

TSX

```
<h1 className="text-5xl md:text-7xl font-bold text-white mb-6 leading-tight
drop-shadow-2xl">
  Rentals. Homes.

  Agents. Loans.
</h1>
<p className="text-xl md:text-2xl text-white/95 mb-8 max-w-2xl drop-shadow-
lg">
  Search thousands of properties in Tampa, Orlando, St. Petersburg, and
beyond
</p>
```

✓ **This file should already be correct** - It contains the Manus design with:

- "Rentals. Homes. Agents. Loans." headline
 - Buy/Get Pre-Approved tabs
 - Search bar with filters
 - BuyAbility calculator
 - Trending homes carousel
-

File 3: Verify `.vercelignore`

Location: Root of your project

Content (Create if missing):

Plain Text

```
.manus
.env.local
.env.*.local
node_modules
dist
.git
```

Steps to Deploy:

1. **Open VSCode** and navigate to your project root
2. **Edit `vercel.json` :**
 - Remove the `"startCommand"` line
 - Remove the entire `"env"` object
 - Save the file
3. **Verify `PropertyHome.tsx` :**
 - Make sure lines 148-155 contain the "Rentals. Homes." headline
 - If not, replace with the code above
4. **Commit and Push to GitHub:**
5. **Wait 2-3 minutes** for Vercel to detect the push and redeploy
6. **Check Vercel Dashboard:**

- Go to <https://vercel.com/danieljames-8268s-projects/business-connector-website-main/deployments>
 - You should see a new deployment building
 - Once it shows "Ready", the Manus design will be live!
-

What You Should See After Deployment:

✓ Hero section with "Rentals. Homes. Agents. Loans." headline ✓ Professional property photo background ✓ Buy / Get Pre-Approved tabs ✓ Search bar with location input ✓ Advanced filter buttons (Price, Beds & Baths, Home Type, More filters, Draw) ✓ BuyAbility calculator section ✓ Trending homes carousel ✓ Value proposition cards ✓ Professional footer

Troubleshooting:

If deployment still fails:

1. Check the Vercel build logs for specific errors
2. Make sure `package.json` has `"build": "vite build && esbuild server/_core/index.ts..."`
3. Verify all dependencies are installed: `npm install`

If you see the old design after deployment:

1. Hard refresh your browser (Ctrl+Shift+R or Cmd+Shift+R)
 2. Clear browser cache
 3. Check Vercel deployment status - it might still be building
-

Questions?

If you encounter any issues, let me know and I can help troubleshoot!
